ZOOL 530 – Honours Research Project in Zoology

ZOOL 530 is a required two-term course that students in Biological Sciences must take as part of their requirements to fulfil an Honours degree in ZOOLOGY.

ZOOL 530 will be conducted within the jurisdiction of the Program of Zoology and all projects must be done under the supervision or co-supervision of a regular or adjunct member of the Zoology Program. ZOOL 530 is required of, and open only to, Honours students in Zoology.

To be eligible to register in ZOOL 530, students must be enrolled in the Honours ZOOL program, must have completed 72 units, have a GPA of 2.75 or higher (over the most recent 30 units), and must have earned a minimum of a C- grade in BIOL 315.

If the Supervisor is not a member of Biological Sciences, a Co-Supervisor from the Department of Biological Sciences is required. In this case, both will have to approve the webform submission before you can be enrolled into the course.

Both the Supervisor and Co-Supervisor must be kept apprised of the project during the term and must be involved in the evaluation of the project and determination of the final grade.

Projects undertaken outside the Zoology program must have a component that aligns with the Zoology program.

Getting a Supervisor
It is the responsibility of the student to decide on a general topic of interest for this course and to approach a suitable faculty member regarding supervision. This must be done well in advance of initiating enrolment into the course.

Have a project idea but unsure who to approach as a possible Supervisor?
Students who have a project in mind but are unsure which faculty members would be potential supervisors should view the research themes carried out by faculty members in Biological Sciences (https://science.ucalgary.ca/biological-sciences/research/research-areas).

GUIDELINES PERTAINING TO THE CONDUCT IN ZOOL 530

Time commitment
Estimated time commitment is a minimum of 8 hours per week (on the project as a whole, which can include lab work, reading, writing, etc.), plus the time required to meet with the Supervisor(s) periodically to discuss progress.

Evaluation criteria
Evaluation criteria include the preparation of a research proposal, a progress reports, research components, a final report, and an oral presentation that is usually given the last or second-last week of classes. Students must agree with the Supervisor(s) on course content and weighting of components. The final grade will be assigned by the Supervisor(s).

Other specific notes:
1. A Research Proposal must be submitted by the student to the Supervisor(s) on or before the end of the first month. Students producing unsatisfactory reports will be required to either rewrite the proposal or withdraw from the course. A student cannot continue in the course until a satisfactory proposal is turned in.

2. The Supervisor’s Assessment of Term Work will be based on the student’s application of techniques, capacity to identify and solve problems, and comments and discussion of results as term work is progressing. The grade standing at the end of the first term will be based minimally on the Research Proposal and the Supervisor’s Assessment of the first term work. Supervisors may request more components to be completed by the end of the first term.

3. At the completion of the project, a final report written in the format of a research journal paper must be submitted to the Supervisor no later than 5 days after the last day of classes (or other date agreed with supervisor). In the case of co-supervised projects, the report will be assessed by both the Supervisor and the Co-Supervisor and a grade awarded as a result of consultation between these two individuals. The grade will be submitted to the Department of Biological Sciences by the Program faculty member no later than 11 days following the last day of classes.

4. All ZOOL 530 students must present an oral presentation on the research they have carried out during the time registered in the course. The presentation will normally occur during the Biological Sciences Undergraduate Research Symposium usually held in
early April. The oral presentation will be graded on the quality of the presentation, not on the quality of the data. Both the supervisor and the co-supervisor are expected to attend the seminar.

GUIDELINES PERTAINING TO REGISTRATION IN ZOOL 530

GPA requirement
To be eligible to register in ZOOL 530 and, students must have completed 72 units, have a GPA of 2.75 or higher (over the most recent 30 units), and must have earned a minimum of a C- grade in BIOL 315.

Meeting with potential Supervisor (and Co-Supervisor if applicable):

1. Provide a current unofficial copy of your transcript.
2. Agreed-upon value and due date for all course components must be determined with your Supervisor(s).
3. Students must be aware that there is an Independent Project Agreement & Checklist form to be completed and signed by the student and Supervisor(s). The last page of the form (Checklist) must be completed and signed by the student and submitted with the final report for the project. The form is available at: https://science.ucalgary.ca/biological-sciences/current-students/undergraduate/procedures-policies-and-forms
4. Be sure to ask about and/or discuss with potential Supervisor(s):
   Type/topic of research, expectations of the student and of the Supervisor(s), time requirements (e.g., minimum of 8 hours per week in total on the independent project), course components that will be required and graded, deadlines for submission of course components

Once the prospective Supervisor has indicated their willingness to supervise you on your project:
Complete the webform (https://science.ucalgary.ca/usc-independent-research-course-application) NO LATER than 10 working days before the add/swap deadline in the term (https://www.ucalgary.ca/pubs/calendar/current/academic-schedule.html).

• If approval is denied at this point, you will be notified by e-mail.
• If approval is granted, staff in the USC will enrol you into the course and you will be notified by email.

ZOOL 530 – Honours Research Project in Zoology will count towards a major in Zoology.

The following component values will be discussed and agreed-upon by the student and supervisor(s) during their initial meeting:

<table>
<thead>
<tr>
<th>Evaluation criteria/course component</th>
<th>Due date (if applicable)</th>
<th>Suggested value range (%)</th>
<th>Agreed value in % (Total = 100%)</th>
</tr>
</thead>
