Seminars

CPSC Celebrate the end of this year with the Department of Computer Science by visiting their first virtual Department Showcase, held via live Zoom sessions. Everybody is welcome to attend. Thursday, May 6, at 4pm and 5pm. To visit the Showcase, follow this link: science.ucalgary.ca/computer-science-showcase-2021

PHAS Calgary Optics & Photonics Student Society (COPSS) colloquium series, May 6th, 2021 at 1:00pm, Dr. Dirk R. Englund, Associate Professor at the Massachusetts Institute of Technology presents a colloquium on “Programming Complexity: Large-Scale Photonics for Quantum Information and Machine Learning”. Video and slides can be viewed here, please register for the Q&A session here.

Opportunities

Assistant Professor/Instructor, Indigenous Science, Faculty of Science

Please be aware that the Faculty of Science is currently advertising for an Assistant Professor/Instructor in the area of Indigenous Science. The position is open to applicants from all disciplines: https://careers.ucalgary.ca/jobs/6630083-assistant-professor-slash-instructor-indigenous-science-faculty-of-science

Opportunities - Health

CIHR Catalyst Grant: Official Language Minority Communities in Health Research

This funding opportunity recognizes the unique challenges of conducting Official Language Minority Community (OLMC) research and offers an opportunity to build capacity. Specifically, this funding opportunity is intended to build capacity to conduct research concerning better integration and access to health services in both official languages and in research relevant to the current issues faced in OLMCs; strengthen networking amongst researchers and organizations; and promote research and knowledge mobilization on approaches that can facilitate access to care for OLMCs. The OLMC Initiative aims at understanding the health issues of French- and English-speaking Canadians who live in communities where they are a minority. Research Services’ final internal deadline for the full application is noon on September 30, 2021. For more information, please see the Funding Deadline calendar.

Contact: Anna LeMarquand

Please note that the full application stage to this competition will be part of the new Research Management System (RMS), and approvals will be obtained electronically.

CIHR Operating Grant: TRANSCAN-3

TRANSCAN-3 aims at promoting highly innovative and ambitious collaborative projects in translational cancer research at the European and international level, and considers that, based on the previous grounds, it is timely and relevant to foster the translation of new knowledge on TME functions into clinical practices. The specific objective of this funding opportunity is to improve the efficacy of personalized treatment of cancer patients through the development of new tools and targeted immunotherapy strategies, based on a better understanding of TME functions and of their impact on the disease course. Each research consortium must involve a minimum of three (3) and a maximum of six (6) TRANSCAN-3 JTC 2021 partners, eligible for funding, coming from different countries whose funders participate in the call. Pre-applications are due to Joint Call Secretariat on June 29, 2021. Research Services’ final internal deadline for full application is noon on December 15, 2021.

CIHR Team Grant: CRISM Phase II: Regional Nodes
In 2015, CIHR provided funding to establish a national research network in substance misuse research named the Canadian Research Initiative in Substance Misuse (CRISM). CRISM is currently comprised of four large multi-disciplinary, integrated teams of substance use researchers, service providers, decision makers and people with lived and living experience, collectively known as the “Network”. CRISM Phase II will be implemented via a sequential, three-stage approach. This funding opportunity is the Regional Nodes Funding Opportunity and is the first stage launched as part of CRISM Phase II. The overarching aim is to provide infrastructure/base funding for a “Network of Networks” made up of five (5) Regional Nodes that will operate independently but work in concert to achieve the objectives of this funding opportunity. Research Services’ final internal deadline for the Letter of Intent stage is noon on June 10, 2021. Research Services’ final internal deadline for full application is noon on January 3, 2022.
