Thesis Defense Seminars

**CPSC** MSc Final Seminar: “Cryptalphabet Soup: DPFs meet MPC and ZKPs” by Kyle Storrier (Supervisor: Ryan Henry) **Wednesday, August 23, 2023 at 10:00am in ICT 516 and Zoom.** Please contact the Computer Science Department for zoom details (cpsc@ucalgary.ca)

**BISI** PhD Final Seminar: “Genomic Signatures of Within-Generation Selection in Coho salmon (Oncorhynchus kisutch) under Enhanced Hatchery-Rearing Practices and in the Wild” by James Bull (Supervisor: Sean Rogers) **Friday, August 25, 2023 at 9:00am in BI 211**

Seminars & Events

**Faculty of Science Innovation Fair** will take place **Wednesday, August 30, 2023 12:00pm to 4:00pm in ICT 114.** This event offers a platform for networking, learning, and inspiration to researchers, industry professionals and enthusiasts and will include lunch, a panel discussions and innovation/Startup demos and networking. Hosted by Innovate Calgary. Register [here](#) to reserve your spot.

**Quantum Neuroscience Workshop** will take place on **Friday, September 1 9:00 am – 1:00 pm in Husky Oil Great Hall Rozsa Centre.** Topics will include: Quantum Biology, Quantum Sensing and Neuromorphic Quantum Computing. Organized by Transdisciplinary Scholarship Initiative. If you would like to present on your research, please contact [transdisciplinary@ucalgary.ca](mailto:transdisciplinary@ucalgary.ca) to express your interest, and include a brief summary of your research area in your email. To attend, please register [here](#).

**MTST** Colloquium: “Lie-Poisson Neural Networks” by Vakhtang Putkaradze (University of Alberta) **Friday, September 1, 2023 at 2:00pm in MS 337 or via zoom.** For more information or to register to receive the zoom link, [click here](#).

**Research Security Open House** **September 14, from 1:00pm to 4:30pm on the 7th floor of MacKimmie Tower.**

**2023 Research Security Conference: Mitigating Risk in a Changing World** will be co-hosted by UCalgary with University of Alberta this fall. Focusing on Canada in an international context with panels on a range of topics, the conference will also offer workshops hosted by the federal government on due diligence reviews and risk assessment forms. [Pre-register](#) to save your spot. **Oct 26-27, 2023 – University of Calgary campus.**

**NSERC – Discovery Grants & RTIs**

Faculty timelines can be [found here](#).

**NSERC Discovery Grants**

Please contact your Associate Head – Research for your departmental review deadline. **Faculty review deadline: October 2 @ 4pm**  
**RSO detailed review deadline: October 18 @ 4pm**  
**RSO final internal review deadline: October 27 @ noon**

RSO Contact: Alisha Kadam  
Science Contact: Rhian Gunn  
If you missed RSO’s info sessions **NSERC DG Info Session on July 5** or the **NSERC DG ECR Info Session on July 20,** please email Alisha Kadam in RSO for a copy of the recording and/or slides.
**NSERC Research Tools and Instruments Grants**

Please notify your Associate Head – Research if you plan on applying for an RTI.

The RTI Grants Program provides the primary avenue for university researchers in the natural sciences and engineering to obtain up to $150,000 in support for research tools and instruments with a net cost between $7,001 and $250,000. Researchers can submit one RTI application per competition, either as an applicant or a co-applicant, but not as both and must meet the eligibility criteria. It is also recommended that researchers consult the available NSERC resources, webinars and instructions when constructing applications.

**RSO detailed review deadline (optional but recommended): October 11 @ 4pm**

**RSO final internal review deadline: October 20 @ noon**

RSO Contact: Alisha Kadam

Science Contact: Rhian Gunn

---

**Opportunities**

**NFRF 2024 Transformation Competition** is designed to support large-scale, Canadian-led interdisciplinary research projects that address a major challenge with the potential to realize real and lasting change. The challenge may be fundamental, leading to a scientific breakthrough, or applied, with a social, economic, environmental or health impact. Projects are expected to be world-leading, drawing on global research expertise, where relevant.

Transformation stream grants will support projects that:

1. tackle a well-defined problem or challenge;
2. propose a novel world-leading approach that is different from the current state-of-the-art approaches to the issue;
3. are interdisciplinary, bringing different perspectives to the defined problem; and
4. have the potential to be transformative, defined as the potential to create a significant and real change or impact—a noticeable leap or tangible breakthrough rather than an incremental advance.

Transformation grants are valued at between $2,000,000 and $4,000,000 per year (including indirect costs) for up to six years. The maximum budget for direct costs is therefore $3,200,000 per year. The competition has three stages: a Notice of Intent (NOI), a Letter of Intent (LOI), and (on invitation only) full application. Research Services will offer an information session to prospective applicants and teams in late September/early October; watch for future communication regarding details. Details re: other UCalgary internal deadlines and support services will follow.

Please notify Research Services at ipd@ucalgary.ca as soon as possible if you may be interested in submitting an application. This will ensure we can share important updates and resources with you/your team to support application development.

**Webinar for Notice of Intent:** August 31 at 11:00 a.m. – 1:00 p.m.
**Notice of intent (mandatory): October 19 at 9am**

**2023 DAAD Research Stays for University Academics and Scientists**

The 2023 DAAD Research Stays for University Academics and Scientists programme offers researchers the opportunity to network amongst colleagues and exchange experience in the framework of short-term research stays in Germany. The scholarships are funded by the German Federal Foreign Office. The programme provides funding for research stays at state or state-recognised institutions of higher education or non-university research institutes in Germany. A research stay can also take place at several host institutions. Funding may only be claimed once within three years, and lecture tours or visits to congresses are not funded.

Eligible applicants are university teachers and established academics and scientists who have usually completed a doctoral degree and work at a university or research institute in their home country. Funding available is up to €6,000-€7,000 for up to 3 months, and funded stays should be completed by January 2025 at the latest.

**RSO Internal Review Deadline: October 11 @ noon**
**Reminders: Upcoming Deadlines**

Contact **Michael Blough** if you are interested in applying.

Contact **Dr. Mark Bauer** if you are interested in applying.
Opportunities – Awards

If you would like support in developing a nomination package (for any award - including those listed below), please contact Danielle Demiantschuk as early as possible. Opportunities can be found on the FOS awards site and on the RSO awards opportunity site.

**Sloan Research Fellowships** recognizes and rewards outstanding early-career faculty (who hold a Ph.D. or equivalent degree in chemistry, computer science, Earth system science, economics, mathematics, neuroscience, physics, or a related field) who have the potential to revolutionize their fields of study. [Details here](#). **Deadline:** September 15, 2023.

**UCalgary Teaching Awards** recognize and celebrate outstanding contributions to teaching and learning. [Details here](#). **Deadline:** September 22, 2023.

**Faculty of Science Awards of Excellence** are now open. These awards are an important way to recognize the incredible teaching, innovation, research, and work in the faculty! [Details here](#). **Deadline:** September 29, 2023.

**Royal Society of London Fellowship** celebrates those individuals who have made a “substantial contribution to the improvement of natural knowledge, including mathematics, engineering science and medical science.” Each candidate is considered on his or her own merits and can be proposed from any sector of the scientific community. [Details here](#). **Deadline:** September 30, 2023.

**Canada Gairdner Awards** (Gairdner Foundation) celebrate the world’s best biomedical and global health researchers through annual prestigious awards. [Details here](#). **Deadlines:** multiple (October 1).

Opportunities – Health Sciences

**CIHR: Faculty Information Sessions & Grant Development Webinar – Grant Basics: How to Submit your Research Grant & Introduction to the Canadian Common CV and CIHR Biosketch (August 22)**

The Cumming School of Medicine Grant Development Office is holding several information sessions and grant development webinars to support applicants to the Fall 2023 CIHR Project Grant Competition. All webinars are open to faculty, staff, and trainees affiliated with the University of Calgary. Please contact Brandi Povitz if you have any questions about the sessions.

**Date and Time:** August 22. [Register here](#).

How to Submit your Research Grant: 2:00-2:30PM
Intro to the CCV and CIHR Biosketch: 2:30-3:00PM
2024 BrightFocus Standard Award Program in Alzheimer's Disease Research awards grants for basic, translational, and clinically oriented research on the causes of, or treatments for, age-related and degenerative diseases. BrightFocus Standard Awards offer USD $300,000 over 3 years.

RSO Internal LOI Review Deadline: August 22, 2023 - 12:00 PM MT
RSO Contact: Chantal Lemire

2023 Climate and Health Interdisciplinary (CHI) Awards
The Burroughs Wellcome Fund (BWF) Climate and Health Interdisciplinary (CHI) Award provides support for collaborative exploratory work that opens new ground for comprehensively assessing or mitigating the impacts of climate change on human health. This program will support both individual scientists and multi-investigator teams. Early career faculty and postdoctoral fellows nearing their transition to independence are especially encouraged to apply, whether individually or within teams. Funding of up to USD $375,000 over 3 years is available to faculty and postdoctoral researchers.

RSO Internal LOI Review Deadline: August 28 at noon
RSO Contact: Chantal Lemire

2023 Alzheimer's Association Research Grant – New to the Field (AARG-NTF) aims to fund investigators who are new to Alzheimer’s and related dementia fields of research. The purpose of this program is to provide independent investigators with unique expertise and apply their knowledge to Alzheimer’s and all other dementias.

RSO Internal LOI Review Deadline: August 31 at noon
RSO Contact: Chantal Lemire

2023 Alzheimer’s Association Research Grant to Promote Diversity (AARG-D) aims to fund early-career investigators who are less than 18 years past their doctoral degree or post-residency (M.D. or D.O.) with funding that will allow them to develop preliminary or pilot data, to test procedures and to develop hypotheses. The intent is to support early-career development that will lay the groundwork for future research grant applications to federal or other funding entities. The objective of this award is to increase the number of highly trained investigators from diverse backgrounds whose basic, clinical and social/behavioral research interests are grounded in the advanced methods and experimental approaches needed to solve problems related to Alzheimer’s and all other dementias in general and in health disparities populations.

RSO Internal LOI Review Deadline: August 31 at noon
RSO Contact: Chantal Lemire

2023 Alzheimer’s Association Research Grant (AARG) aims to fund early-career investigators who are less than 18 years past their doctoral degree or post-residency (M.D. or D.O.) with funding that will allow them to develop preliminary or pilot data, to test procedures and to develop hypotheses. The intent is to support early-career development that will lay the groundwork for future research grant applications to federal or other funding entities.

RSO Contact: Chantal Lemire

2023-24 Leducq International Networks of Excellence Program looks to support original and outstanding research in the areas of cardiovascular and neurovascular disease. Applicants are encouraged to think innovatively and to propose bold new ideas. Nevertheless, while the foundation will bear the risks inherent in innovative research, submitted proposals should not be merely speculative, and all applicants should provide a clear hypothesis and rationale for the research plan. Leducq Foundation accepts applications in basic, translational, and clinical science, including collaborative “bench to bedside and back” programs. Applicants should aim for results that, at the conclusion of the five-year term,
have the potential to advance the diagnosis, management, or prevention of human disease, consistent with the overall mission of the Leducq Foundation. The International Networks of Excellence Program award is $8,000,000 over five years.

**RSO Internal LOI Review Deadline: August 31 at noon**
RSO Contact: Chantal Lemire

**Advancing Research on Care & Outcome Measurement 3.0 (ARCOM-3)**
The ARCOM funding program aims to address significant gaps in care and outcome measurement and provide an opportunity to advance research— including quantitative, qualitative and mixed methodological approaches— so that care providers can ensure that they are implementing evidence-based practices (using measures to guide care provision) and achieving desired outcomes (using measures to assess individuals living with Alzheimer’s or other dementia and care partner outcomes). Work funded through ARCOM must directly advance research projects focused on: (i) development of new—and/or validation of previously developed—measures of care; (ii) measurement of outcomes where measurement gaps exist; and (iii) evaluating the use of such measures in improving care and outcomes across diverse and underrepresented populations, at different stages of dementia, and/or in various settings.

**RSO Internal LOI Review Deadline: September 15 @ noon**
RSO Contact: Chantal Lemire

**Cystic Fibrosis Foundation: 2024 Spring Clinical Research Award**
The 2024 Spring Clinical Research Awards are offered to provide support for investigator-initiated clinical research projects that have the potential to make an important contribution to the CF Foundation’s mission. Research projects may address diagnosis, treatment, management of disease or symptom, or the pathophysiology of CF using clinical (observational/interventional), translational or epidemiologic study approaches. Applicants must demonstrate access to sufficient numbers of CF patients and appropriate controls.

**RSO Internal LOI Review Deadline: September 18 @ noon**
RSO Contact: Chantal Lemire

**Cystic Fibrosis Foundation: 2024 Spring Clinical Pilot and Feasibility Award**
The Cystic Fibrosis Foundation 2024 Spring Clinical Pilot and Feasibility Awards are offered to support projects involving human subjects that will develop and test new hypotheses and/or new methods (or those being applied to the problems of cystic fibrosis for the first time), and to support promising new investigators as they establish themselves in research areas relevant to cystic fibrosis. The intent of these awards is to enable investigators to collect sufficient preliminary data to determine the best strategies and methods for approaching a major question that ultimately will require assessment through larger-scale research and/or multi-center, collaborative trial. Special consideration will be given to those projects that pursue new approaches, study under-researched topics, or investigate more creative avenues of research to address the problems of CF.

**RSO SSHRC Partnership Programs Session – Monday August 28th at 11:00AM**

Join us on Monday, August 28, 2023 from 11:00AM-12:30PM as representatives from the External Grants team, the Institutional Programs Division, and the Knowledge Engagement team discuss preparing an application for the SSHRC Partnership stream of funding (including Partnership Engage Grants, Partnership Development Grants, and Partnership Grants). Topics covered include an overview of research partnerships, partner eligibility and application requirements for SSHRC, RSO support services, and other considerations when preparing applications. Presentation will be followed by a short Q&A period.

All UCalgary faculty and staff members are welcome. To join this session, register at this link by Friday, August 26th (click on “Reserve a Spot”). You will receive the Zoom link and password ahead of the meeting.

During the meeting, please mute yourself and turn off your video for the duration of the call to ensure stability for the call. Questions can be sent in advance to Stephanie (email below) or asked in the chat box to be addressed during the Q&A period.

**RSO Contact:** Stephanie Patrick

**Graduate Students and Postdocs**

**Burroughs Wellcome Fund (BWF) Career Awards at the Scientific Interface**

- **Amount:** $560,000 (US) over 5 years
- **Internal Deadline (Letter of Intent):** August 29, 2023
- **Eligibility:** These grants are intended to foster the early career development of researchers who are dedicated to pursuing a career in academic research. The specific target group are researchers who have transitioned from graduate work in the physical/mathematical/computational sciences or engineering into postdoctoral work in the biological sciences. These awards are open to U.S. and Canadian citizens, permanent residents, and temporary residents.

Please contact [Danielle Demiantschuk](mailto:Danielle.Demianschuk@ualberta.ca) if you are interested in applying.

**Innovation Catalyst Grant**

The Innovation Catalyst Grant (ICG) is an entrepreneurial fellowship designed to support recent graduates (Master’s or PhD) in Science, Technology, Engineering and Mathematics (STEM) disciplines. This grant provides a 2-year runway for applicants to develop and commercialize innovative, science-based products and services that contain a hardware component. The ICG is designed to provide aspiring entrepreneurs with annual stipend, seed funding, lab and office access, technical mentorship, business development and networking.

Contact [Alicia Couto](mailto:Alicia.Couto@ualberta.ca) at Innovate Calgary for more information.

**Submission deadline is September 15, 2023**

---

**Did You Know?**

**Wednesday, August 23, 2023**

- **Staff Retreat (ICT 102)** – 8:30am to 11:45am
- **Lunch (LDL)** – 12:00pm to 1:30pm
- **Town Hall (ICT 102)** – 1:45pm to 3:30pm

---

**F2023 Special Topics Courses for Science Grad students**

The Faculty of Science is offering the following Special Topics courses in Fall 2023.

Students who wish to register should contact the [Graduate Science Centre](mailto:Graduate.Science.Centre@ualberta.ca)
SCIE 601 Theory and Practice of University Teaching and Learning in STEM Emphasizing a research-to-practice approach, this course will engage students in readings and discussions about current research, theory and methodological approaches, and pedagogical approaches in Discipline-Based [STEM] Education (DBER) research. Course readings will be varied and include scholarly, practical, and popular readings in order for students to gain nuanced understandings of the social contexts and related issues and challenges of college and university STEM education. Course materials will also emphasize critical, antiracist and decolonizing frameworks to transforming postsecondary STEM education for the belonging of diverse students and cultural-scientific worldviews. While there will be seminal readings, aspects of the course will be co-designed with students’ interests and professional needs in mind. Activities will be geared towards designing environments for equitable postsecondary STEM education, broadening ideas about assessments and evidence of student learning, SoTL research and other topics that emerge from students’ interests and experiences.

Tuesday, 12:30-3:20pm; Instructor: Jennifer Adams

Prerequisite: Admission to a MSc or PhD program in the Faculty of Science and consent of the instructor.
See attached pdf for more information

SCIE 699.01 Communication & Effectiveness: This course develops skills in communication and effectiveness. Students learn about good visualization and science storyboarding. Using this framework, they write a research proposal and give an oral presentation. Students practice collaboration considering diversity in personality and culture. They reflect on career planning as they prepare a resume and CV. They consider their strategies to achieve their career goals, and strive to improve effectiveness skills, such as time management. Course outcomes are a research proposal for the Graduate Awards Competition, a resume, and a Three-Minute-Thesis (3MT) presentation.

Tuesday and Thursday, 9:30am to 10:45am in ENA 101.
Prerequisite: Consent of the Faculty
See attached pdf for more information

Science Research and Innovation Newsletter (SRIN) comes out every Monday. If you have a seminar notice, congratulations or awards for the newsletter please submit it by noon on Friday to sci.borg@ucalgary.ca to ensure it is added.
